Superior service, excellent quality. Randy and Dan did an excellent job rewiring our 100 year old home. They took great care of our home by covering the floors and using a vacuum to keep the house clean. Their electrical work speaks for itself everything turned out flawless and their expertise illuminates our home. (Hide)

These guys are what you would expect from a contractor, hard working, knowledgeable, friendly, and clean. I had ideas and Randy had solutions. Randy is a great electrician and comes highly recommended.

These guys rock!! They are clean, professional, and do great work. My husband and I have had them out on many occasions as we slowly upgrade our home and we have been pleased over and over again with their expertise. We have already recommended them to our family and friends and they agree. (Hide)

Excellent service with exceptional quality. Randy and Dan did a beautiful job lighting my new club basement. Dimmer switches and different types of lighting help create a wonderful atmosphere for my family and friends. Highly recommended.

Highly recommended. Randy and his assistant, Dan, were both kind and professional and did a great job wiring and installing two ceiling fans in a vaulted ceiling for me. Not only did they perform the electrical job I hired them for, but because they had a few extra minutes of time, they offered to also fix a few minor things in my home for me. They worked efficiently, protected my furniture, and cleaned up their trash after the job was completed. I am very pleased with the work they performed and will call them again for future electrical needs. (Hide)
